DORSEY FRAME HOUSE

AL-VI-B-065 Paradise Road, Midland ca. 1890

The Dorsey Frame House is a two story, three bay wide, "L" shaped frame structure. The house is typical of the rural style of architecture found in Allegany County in the latter part of the 19th century. Similar to the other houses of this style, the house exhibits some of its own unique features which makes each of these houses a little different from each other.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Dorsey Frame House is located on the south side of Paradise Road in Midland, Allegany County.

The Dorsey House is a two story, three bay wide, "L" shaped frame structure that has been covered with weatherboard. The entire structure rests on a low stone foundation with a plain water table. A small shed roof addition abuts the main block on its eastern side; it has been covered with novelty siding. The roof is gabled with a boxed cornice and returns and is covered with asphalt shingles. The Northern gable end is partially covered with fish scale shingles. Windows in the structure are double hung, wooden sash frames with a combination of one over one and two over two lights. In addition, all window frames have architrave trim and cornices. The main entrance is located on the western facade and features a vertically paneled door with original hardware and a transom light. It is covered by a three bay hipped roof end porch which is supported by brackets, chamfered columns and a banister. Three original, corbeled brick chimneys are located in the interior of the building.

The Dorsey House is in fair condition and retains much of its original fabric and appearance.

STATEMENT OF SIGNIFICANCE

The Dorsey Frame House, located near Midland, is a typical example of rural architecture found in Allegany County in the latter part of the 19th century. In all probability, the house was constructed circa 1890 and like many others, exhibits its own unique features which makes each of these houses a little different from the others. Like numerous other houses in the county, the house exhibits the typical features of a two story, three bay wide, "L" shaped structure with gabled roof. Although the style is rather conservative, the size of the structures above point to the fact that the inhabitants were a little more prosperous than the average citizen of Allegany County, and these structures remain an architectural reminder of a way of life once found in Allegany County.
